• Technologies & Programming Languages

- HTML5	- JavaScript
- CSS3	- OOP
- Tailwind	- JSON
- Bootstrap	- AJAX
- Git	- React.js
- GitHub	

• Soft Skills

- Time Management	- Collaboration
- Adaptability	- Continuous Learning
- Attention to Detail	- Problem Solving

PROJECTS

• Wordle-Challenge

- A clone of the famous Wordle game.

An entertaining and interactive game that enhances thinking, concentration, and reading skills. The game allows you 7 attempts to guess the correct word. You select the letters from the available buttons \and enter them into the designated boxes. The attempts is calculated, and this count is reduced by one with each incorrect attempt. The count stops when it reaches zero, and the game ends.
- Technologies used (HTML, CSS, Grid System, JS, JSON)

• A Dashboard ↗

- For online courses.

An admin panel for online courses allowing management of the content and settings easily. The panel features a simple and user-friendly interface with complete control over the available courses, add new courses, edit them, and delete them.

In addition to listing courses and viewing details. Moreover, managing subscribers, assigning permissions, and tracking students' progress in the courses.
- Technologies used (HTML, CSS, Grid System)

• An online To-Do list ↗

- For daily tasks.

A website for notes is an online tool that allows users to add and manage daily tasks. You can create notes to remind yourself of the tasks you want to accomplish and set their due dates. Additionally, you can add extra details or additional notes to each task. You can track the status of tasks (such as "completed" or "in progress") to monitor your progress. The website provides a simple and user-friendly interface for organizing and managing daily tasks in an orderly manner.
- Technologies used (HTML, CSS, JS, Local Storage for Save Tasks)
